## **Chapter 1. Introduction**

This is the demo for report generation. The data will be fetched monthly from thingspeak channel and will be analysed accordingly.

Disclaimer: Not all graphs n charts are shown in this report. This report is just for example purpose.

---

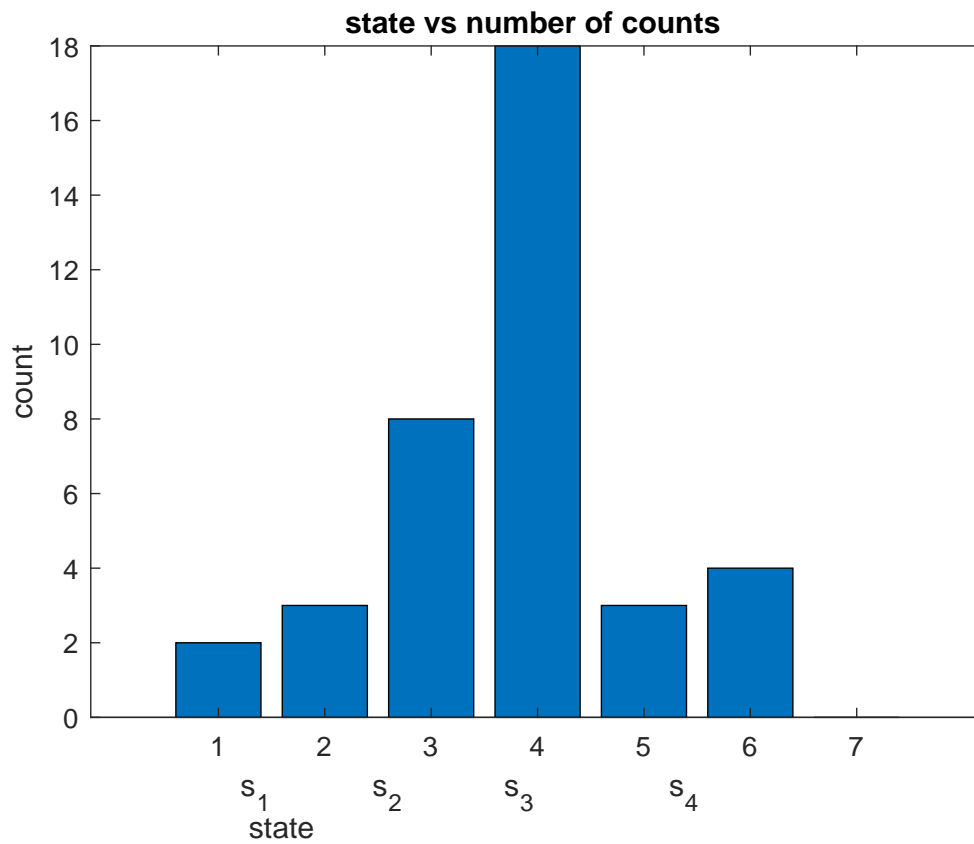

## Chapter 2. distribution of disease

This Pie chart gives information about percentage of each disease out of total registered cases. This will help to determine which disease is prevailing the most in the country.

---

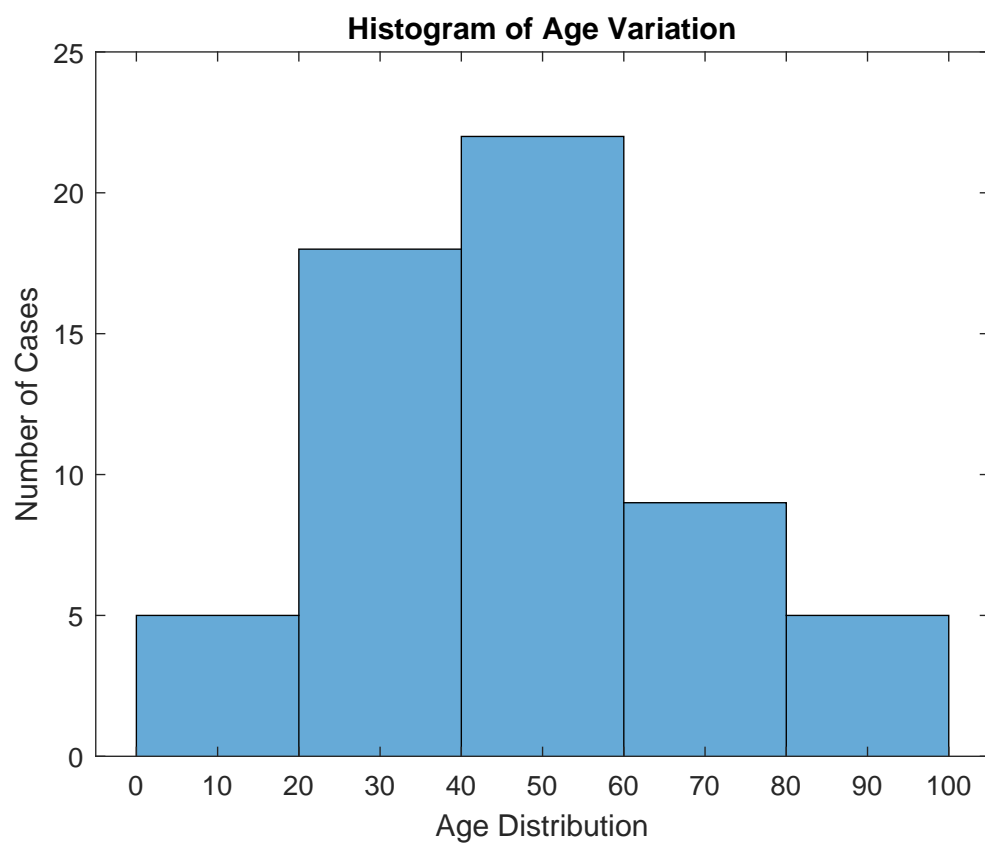

### Chapter 3. States vs Diseases count

This graph will be generated for each disease individually. This gives authorities insight about the number of cases in particular state and how it is as compared to national count

---

## Chapter 4. Age wise classification

---

## Chapter 5. Classification according to gender
